

Name:

Student ID:

PHY 2053-0001, Fall 2011, Dr. Colwell

I understand that I am responsible for registering my clicker ID number under my name at www.iclicker.com and that only I am to use that clicker in class.

In class, discussion of clicker questions with other students in my clicker group is not only encouraged, it is required. Discussing clicker questions in class is NOT cheating, it is part of the clicker learning exercise. In some cases, individual clicker questions will be asked where no collaboration is allowed. These will be clearly announced as such in class.

Use of another person's clicker is PROHIBITED. I understand that if I use a clicker other than the one registered under my name, I will receive a grade of F for the class.

I also understand that if anyone other than me uses my clicker in class I will receive a grade of F for the class.

Other rules and guidelines, including the UCF Creed, are in effect for this class as spelled out in the syllabus.

Unless stated explicitly otherwise, exam 1 covers all material prior to exam 1. Exam 2 covers material since exam 1. Exam 3 covers material since exam 2.

The distribution of points for grades as well as the grade scale in your printed syllabus have been revised since the syllabus was printed. The most updated information on grades is always posted in the syllabus on-line. This breakdown of points supercedes that in Version 1.3 of the syllabus:

Two in-class exams (two highest of three exams): 35%

Final exam (cumulative): 22%

Laboratory (including pre- and post-labs, and recitation quizzes): 25%

Homework (on-line): 9%

Clicker questions (in class): 9%

The default grade scale is: A: 88-100 B: 75-88 C: 62-75 D: 50-62 F: below 50 and will be "curved" if needed.

By my signature below I acknowledge that I have read and understood these rules and the class syllabus.
